Congressional Black Caucus: Constituents at a Glance

Center for Policy Analysis and Research

Congressional Black Caucus Foundation. Inc.

The Congressional Black Caucus (CBC) consists of 42 members of the U.S. House of Representatives and one member of the U.S. Senate. Four new members joined the CBC in the 109th Congress. As the Caucus expands, so do the number and variety of constituents they serve:

- Today the Congressional Black Caucus represents 36.9 million constituents.
- The Congressional Black Caucus represents a racially and ethnically diverse population.¹ Overall, 38 percent of constituents are African American, 49 percent are White Americans, and 13 percent are Latino. A total of 14 CBC districts do not have a majority—50 percent or more—of African American constituents.
- There is a great balance to the makeup of constituents that Congressional Black Caucus members represent. The Caucus represents 6.4 million African American males, of which 4.2 million are 18 years and older. Additionally, the Caucus serves 7.6 million African American females and 5.4 million are 18 years and older. In total, CBC members represent a great number of White constituents, 8.3 million White males and 8.6 million White females.
- At least 10 CBC districts have poverty rates that are more than twice the U.S. poverty rate of 12.5 percent. The concentration of poverty among CBC member districts ranges from 9 percent to 32 percent. Overall, 17 percent of constituents are in poverty within CBC districts.
- On average, the income of constituents within 8 CBC districts exceeds the U.S. median of \$42,409. Also, the median income of constituents in 34 CBC districts exceeds the U.S. average income (\$29,177) for African Americans.

African

American

38%

April 2005

¹Without the state of Illinois represented by Senator Barack Obama, CBC constituents constitute 49 percent of African Americans and 32 percent of White Americans.

What is the Center for Policy Analysis and Research (CPAR)?

The Congressional Black Caucus Foundation, Inc. (CBCF), a Section 501(c)(3) nonprofit, non-partisan organization, serves as a policy-oriented catalyst to educate future leaders and promote collaboration among community and business leaders.

As part of the Congressional Black Caucus Foundation, the Center for Policy Analysis and Research (CPAR) comprehensively creates, identifies, analyzes, and disseminates policy-oriented information critical to advancing the African American community towards economic independence, education, and health equity.

CPAR Philosophy

Quality research and policy analysis are essential for crafting effective policies that meet the needs of African Americans and other underserved populations. Policy-makers must have good information in order to assess the viability of existing policies and to formulate new policies that effectively address outstanding social problems. Despite the need for quality policy analysis and research, there are relatively few existing resources from which policymakers can receive information from an African American perspective. The Congressional Black Caucus Foundation, Inc. has established the Center for Policy Analysis and Research (CPAR), in order to facilitate evidence-based policymaking and positively influence public discourse on important issues.

Purpose

The goal of CPAR is to improve the socio-economic circumstances of African Americans and other underserved communities by:

- Generating insightful analyses of policy alternatives for existing and emerging policy issues in the areas of African Globalism, education, economic development, public health and social welfare;
- Identifying and disseminating policy-relevant research;
- Facilitating substantive communication between academics and policymakers and;
- Disseminating vital information to African American elected officials, academics, media and the general public.
